## **DETAILED ACTION**

### ***Response to Amendment***

Claims 18-21 are canceled.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7, 11, 22 and 23 are rejected under 35 U.S.C. 102(e) as being anticipated by Buttner-Janz US Patent 5,556,431.

Buttner-Janz discloses an intervertebral disc comprising a first and second components (1 & 2) having a first and second bearing surfaces (6), a first and second laterally extending flanges (7) and a first and second articular surfaces (see Figs. 1 & 2 element 3 and 4).

Regarding bearing surface being offset from a first and second center point (see element 7 being offset from the center point of plates 1 & 2).

Regarding claim 11, see Fig. 2.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3738

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9, 10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Buttner-Janz US Patent 5,556,431 in view of Coates et al US Patent 6,899,735 B2.

Buttner-Janz discloses the invention substantially as claimed. However, Buttner-Janz does not disclose a coating with a bone-growth promoting substance and an implant made of a cobalt-chrome-molybdenum metallic alloy.

Coates et al teaches an intervertebral implant made of cobalt-chrome-molybdenum metallic alloy and having bone-growth substances for the purpose of promoting the growth of bone tissue and have a biocompatible implant (see col. 4, lines 1-16).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the material property and add a coating of bone-growth promoting substance in order to promote the growth of bone tissue and have a biocompatible implant.

#### ***Allowable Subject Matter***

Claims 8, and 13-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 24-27 are allowed.
